## HYDROMECHANICAL GREASE INTERCEPTORS

### Corrosion-Resistant Polyethylene: Better than Concrete or Steel

Constructed from rugged, rotationally-molded polyethylene, Great Basin interceptors are designed to withstand heavy use and resist corrosion, ensuring long-lasting durability. Their hydromechanical efficiency guarantees superior separation of fats, oils, and grease from wastewater before it enters your plumbing system.

- Low profile
- Built-in flow control
- Triple outlet for installation flexibility
- Pumpout port connection

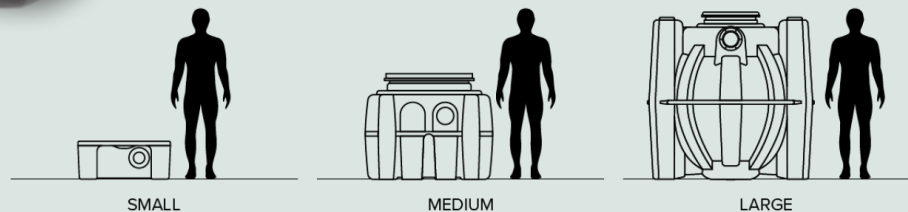

### Accessories:

- Field cut risers
- Pumpout port kit
- End adapters
- FPT fittings
- Support kits

### SCHIER'S LIFETIME WARRANTY

Grease Interceptors  
Built to Last a Lifetime

Schier guarantees that the interceptor will be free from any defects in material and workmanship during the lifetime of the plumbing system in which the products were originally installed.
