

High Efficiency Oil/Water Separators

Keep wastewater clean and safeguard the environment with Striem's OS Series High Efficiency Oil/Water Separators. Engineered to prevent petroleum oils from contaminating sanitary sewer systems, soil, and water sources, these long-lasting separators are ideal for vehicle service stations, car washes, parking garages, and more—helping you maintain a cleaner, more responsible operation.

With next-generation efficiency, the OS Series achieves at least 98% oil separation, ensuring consistent, high-performance filtration you can trust.

Each unit is built to last, made from durable, corrosion-resistant polyethylene for underground installation. Adjustable risers make setup quick and hassle-free, while sturdy pedestrian or traffic-rated covers add extra durability to handle heavy use.

Upgrade to the Slick Stick™ oil level monitoring system for real-time maintenance alerts, so you can stay ahead of servicing and keep operations running effortlessly.

Available accessories

- Field-adjustable risers
- High water hold-down kits
- Oil level monitoring system
- H2O-rated cast iron covers
